

Issue recurring - task #12

Add ability to clear/set arbitrary issue field on recurrence for in-place recurrences

<b>Category:</b>		
<b>Target version:</b>	unspecified	
<b>Redmine version:</b>	unspecified	
<b>Description</b>		
Use case: when recurrence requires scheduling some appointment, you want to set appointment time in issue field (e.g. custom field called "due time"). Then after closing - when next recurrence is scheduled - you want to have "due time" cleared as you need to schedule an appointment once again, probably on different time.
