

Issue recurring - task #26

Plugin doesn't work when you have a recurrence to a bloqued user

2020-05-12 01:38 - lupa18

Status:	closed
Priority:	bug
Assignee:	cryptogopher
Category:	
Target version:	1.6
Redmine version:	4.1.x

Description

After blocking a user, plugin fails for other recurrences.

This is the error when trying to create them:

```
rake aborted!
ActiveRecord::RecordInvalid: Validation failed: Assignee is invalid

```

after deleting the blocked user recurrences, the plugin begin working again.

thanks in advance !

History

#1 - 2020-05-12 18:10 - cryptogopher

- Status changed from new to feedback
- Priority changed from bug to 5

Hi, thank you for reporting!

What is a role of the blocked user regarding this issue? Do I understand correctly, that the recurring issue has been assigned to the blocked user?

It would be best if you could provide:

- steps required to reproduce the problem,
- what outcome would you expect instead of error you get (in case the blocked user has been set as an assignee, I think the best plugin could do is to apply default Redmine assignment procedure for new issue; but please let me know what you think).

#2 - 2020-05-15 21:46 - cryptogopher

- Status changed from feedback to closed

Fixed in [93593d4b](#)

When previous assignee is no longer assignable (e.g. due to account being blocked or any other reason recognized by Redmine) and keep_assignee setting is used, default Redmine assignment applies and warning is recorded in issue's note.

Fix will be available in earliest release.
